Akshat Deep Astik

Results-driven MERN Stack Developer with 1.5+ years of experience and a proven record of delivering 25+ high-performance web applications. Skilled in building secure APIs, dynamic UI components, and scalable full-stack solutions. Strong problem-solver with a passion for clean code, performance, and product-focused development.

Experience

MERN Full Stack Developer — FirmAds

Hyderabad,India | May 2024 – Nov 2025

- Developed and maintained scalable, high-performance web applications using MongoDB, Express.js, React.js, and Node.js (MERN).
- Implemented key features like user authentication, admin dashboards, and API integrations, improving overall efficiency and UX.
- Collaborated with designers and product teams to build responsive UIs using Tailwind CSS, SCSS, and Bootstrap.
- Integrated AWS services for deployment and utilized Jest for testing and ensuring code reliability.
- Built reusable UI components and managed state using Redux and TypeScript.

Projects

Real Estate Listing Portal

GitHub: Frontend |Backend

- Built a full-stack application to help users find and list rental properties.
- Implemented JWT-based authentication and property management with Prisma + MongoDB.
- Developed search and filter features, detailed listings, and chat with landlords.
- Designed a dynamic and responsive UI using React.js and Tailwind CSS.

Real-Time Chat Application

GitHub: Link

- Created a real-time messaging platform with Socket.IO, React, and Node.js.
- Integrated MongoDB for chat history and JWT authentication for user security.
- Built a responsive UI that supports multiple chat rooms and instant communication.
